25X1A

Comment. During the reported period, a total of 3,389 carloads of grain entered East Germany, which would amount to 50,835 tons of grain if it is assumed that the average load capacity is 15 tons per car. As 3,435 cars with 51,525 tons of grain were imported to East Germany in February, the volume of grain imports remained about constant.
